RESEARCH INTERESTS

My current research projects focus on the applications of image processing, computer vision, machine learning, pattern recognition and mathematical modeling in biological and biomedical image analysis and informatics.

I have been developing algorithms for histological tissue images analysis since 2013. My research includes developing automatic feature extraction and classification methods to solve object detection, object classification and image segmentation problems in histopathological tissue images.

PROJECTS' OVERVIEW

At [Computer Vision and Pattern Discovery \(CVPD\)](#) group of [BII](#), Singapore.

- Leading and co-developing projects (2021 onwards)
 - Automated histological tissue image based assessment for multiple cancers including Lung cancer (NSCLC) with Genome Institute of Singapore (GIS), Singapore General Hospital (SGH), and National Cancer Centre Singapore (NCCS).
 - AI Driven National Platform for CT Coronary Angiography for Clinical and Industrial Applications (APOLLO) with National Heart Centre Singapore, Institute for Infocomm Research (I2R), Institute of High Performance Computing (IHPC), Nanyang Technological University Singapore, National University of Health Sciences, and Tan Tock Seng Hospital (TTSH).
- Projects during PhD (2013-2017):
 - Automated nucleoli detection system for prostate/breast/kidney histopathological images with TTSH.
 - Automated gland segmentation system for prostate histopathological images with TTSH.
 - Automated grading system for kidney Histopathological images with Institute of Bioengineering and Nanotechnology (IBN, A*STAR), SGH, and NCCS for clear cell renal cell carcinoma (ccRCC).

At [Computational & Molecular Pathology Lab \(CMPL\)](#) of [IMCB](#), Singapore. (2018-2021)

- Developed an automated image processing pipeline to detect and quantify multiple immunophenotypes in histological prostate tissue samples with National University Hospital. Our pipeline integrates powerful image processing and machine learning methods to analyse histopathological tissue whole slide images (WSI) for tumor microenvironment quantification.

EDUCATION

Jan 2013 - Dec 2017	Ph.D. in Computer Science , School of Computing, National University of Singapore . Singapore. Thesis: Automated Image Based Tools For Digital Pathology. Research Area: Digital Pathology, Computer Vision, Machine Learning. Supervisors: Dr. Hwee Kuan LEE and Prof. Wing-Kin SUNG, Ken .
Jul 2008 - Jun 2012	B.Tech. in Information Technology (Hons.) , Indian Institute of Information Technology Allahabad . Prayagraj, India. Thesis: Speech Retrieval. Research Area: Speech Processing, Information Retrieval, Machine Learning. Supervisor: Prof. Uma Shanker TIWARY .

AREAS OF EXPERTISE

-
- **Artificial Intelligence:**
Deep Learning, Machine Learning, Clustering, Pattern Recognition, *etc.*
 - **Computer Vision:**
Image Analysis, Image Segmentation.
 - **Software Engineering:**
Git, CI/CD development, Project Management and logistics.
 - **Medical Imaging:**
Digital Pathology problems of prominent nucleoli detection, gland segmentation, automated cancer assessment, multiplexed fluorescent immuno-phenotype quantification.

TECHNICAL STRENGTHS

Programming Languages	Python, Javascript, C, C++, R, Java.
Software Packages	MATLAB, \LaTeX , gnuplot, ImageJ, Oracle, iMovie, QuPath,
Libraries Explored	Docker OpenCV, TensorFlow, Keras, PyTorch, VTK, scipy, Pysim- pleGUI, Matplotlib, Pandas, Seaborn, Boost C++ library, Re- act.js, Node.js, Django.
Communication Languages	English (Advanced working proficiency), Hindi (native pro- ficiency).

WORK EXPERIENCE

Bioinformatics Institute (BII) , Singapore.	July 2023 - .
<i>Senior Scientist I</i> at the Computer Vision and Pattern Discovery (CVPD) group of BII , Singa- pore.	
Yong Yoo Lin School of Medicine, NUS , Singapore	January - April 2024.
<i>Invited Lecturer</i> for PHM5005 - AI and Machine Learning for Precision Medicine .	
Bioinformatics Institute (BII) , Singapore.	April 2022 -June 2023.
<i>Senior Post-doctoral Research Fellow</i> at the Computer Vision and Pattern Discovery (CVPD) group of BII , Singapore.	

Bioinformatics Institute (BII), Singapore.

May 2021 - March 2022.

Post-doctoral Research Fellow at the [Computer Vision and Pattern Discovery \(CVPD\)](#) group of [BII](#), Singapore.

[Institute of Molecular and Cell Biology \(IMCB\)](#), Singapore.

May 2018 - April 2021.

Research Fellow (Post-doctoral) at the [Computational & Molecular Pathology Lab \(CMPL\)](#) of [IMCB](#), Singapore.

[National University of Singapore](#), Singapore

August 2015 - December 2015.

Part Time Teaching Assistant at Department of Computer Science,

- Tutor for
 - CS3244 Machine Learning and
 - CS6205 Advanced Modelling and Simulation modulesat Department of Computer Science, National University of Singapore.
- **Lecturers:** [Prof. Chew Lim TAN](#) and [Dr. Hwee Kuan LEE](#).

[University of Alberta](#), Canada

May 2011 - July 2011.

Research Assistant in “Optimization of CO_2 Injectivity in Geological Carbon Storage” project with [Prof. J. Fraser Forbes](#) and [Prof. Vinay Prasad](#).

DISSERTATIONS

[National University of Singapore](#), Singapore

January 2013 - December 2017

Supervisors: [Dr. Hwee Kuan LEE](#) and [Prof. Wing-Kin SUNG](#), [Ken](#).

Weblink: [PDF@NUS Scholarbank](#)

- Developed an automated image based prominent nucleoli detection system for histopathological images.
- Developed a machine learning and image processing based automated system for gland segmentation in prostate histopathological images.
- Developed an automated image based grading system using nuclear patterns for renal histopathological images.

The above projects were implemented using C++, OpenCV, and Python.

[Indian Institute of Information Technology-Allahabad](#), India

January 2012 - July 2012

Supervisor: [Prof. Uma Shanker TIWARY](#)

- Development of software using CMUSphinx library, C++ and Java to transcribe a large amount of audio data into text format and facilitate search using audio queries.
- Use of multiple text document summarization based approach by incorporating human knowledge represented via fuzzy logic-based word-mesh and sentence-mesh.
